Laser Pioneering Company ELEMENIC

A

Premium Long pulsed Laser

Three wavelength Long pulsed laser in one machine
- Alexandrite+Nd:YAG+KTP

Best-in-class specification

Big spot size (up to 24mm) & Power full energy (100J/300ms) & high speed(Long-width up to 3Hz, Short-width up to 10Hz)

B

C

Multi cooling system

Stronger and more effective with less side effect, also has button to choose from cryo cooling to air cooling

Halo-Toning

Halo-Toning uses special fractional hand piece and powerful long-pulse energy to reach the fine energy core by stimulating melanin and collagen with natural regenerative promotion effects which produces whitening and lifting effects at the same time.

D

Premium Long Pulsed Laser System - ELEMENT

01 Long pulsed Nd:YAG-1064nm

Rejuvenation

- Tightening
- Telangiectatic Melasma
- Acne

Hair removal

Vascular lesions

- Telangiectasia
- Red & Blue Vein

Onychomycosis

02 Long pulsed Alexandrite-755nm

Hair removal

Pigmented lesions

- Melasma
- Lentigines
- Freckle
- Keratosis

Skin whitening

03 Long pulsed KTP-532nm

Vascular lesions

- Diffuse redness
- Telangiectasia
- Venous Lake

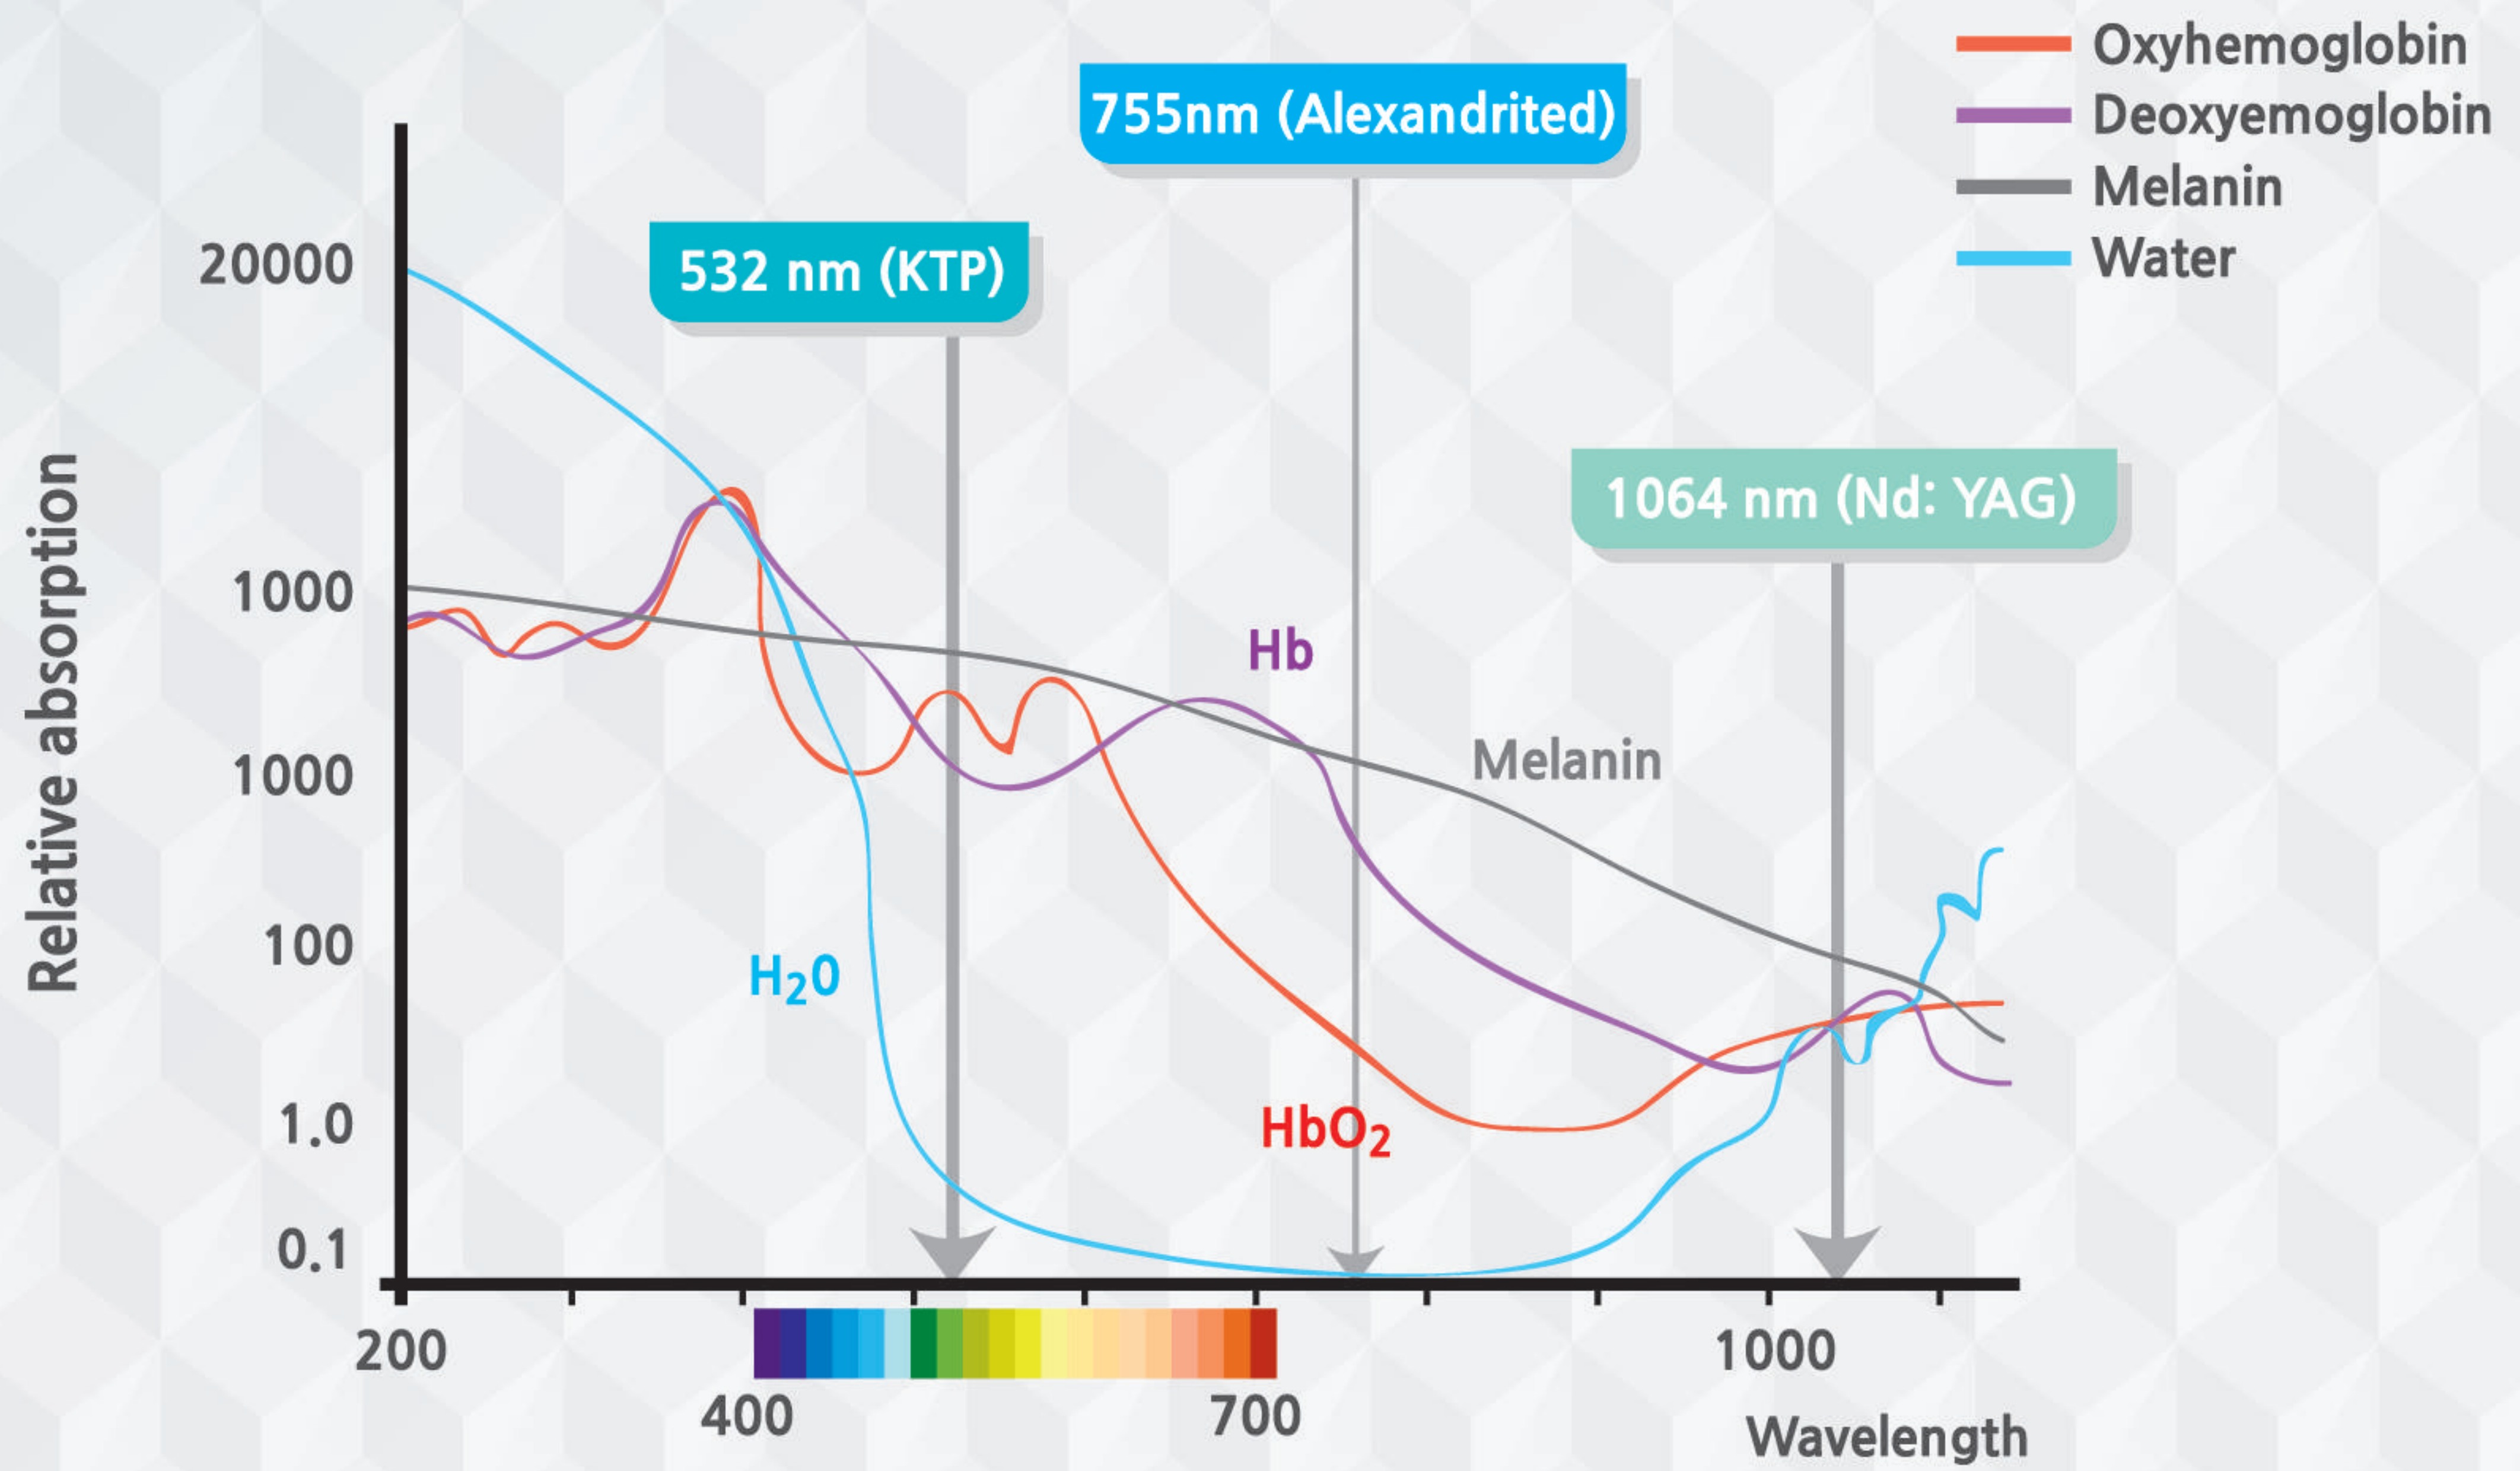

Pigmented lesions

ELEMENIC
Application

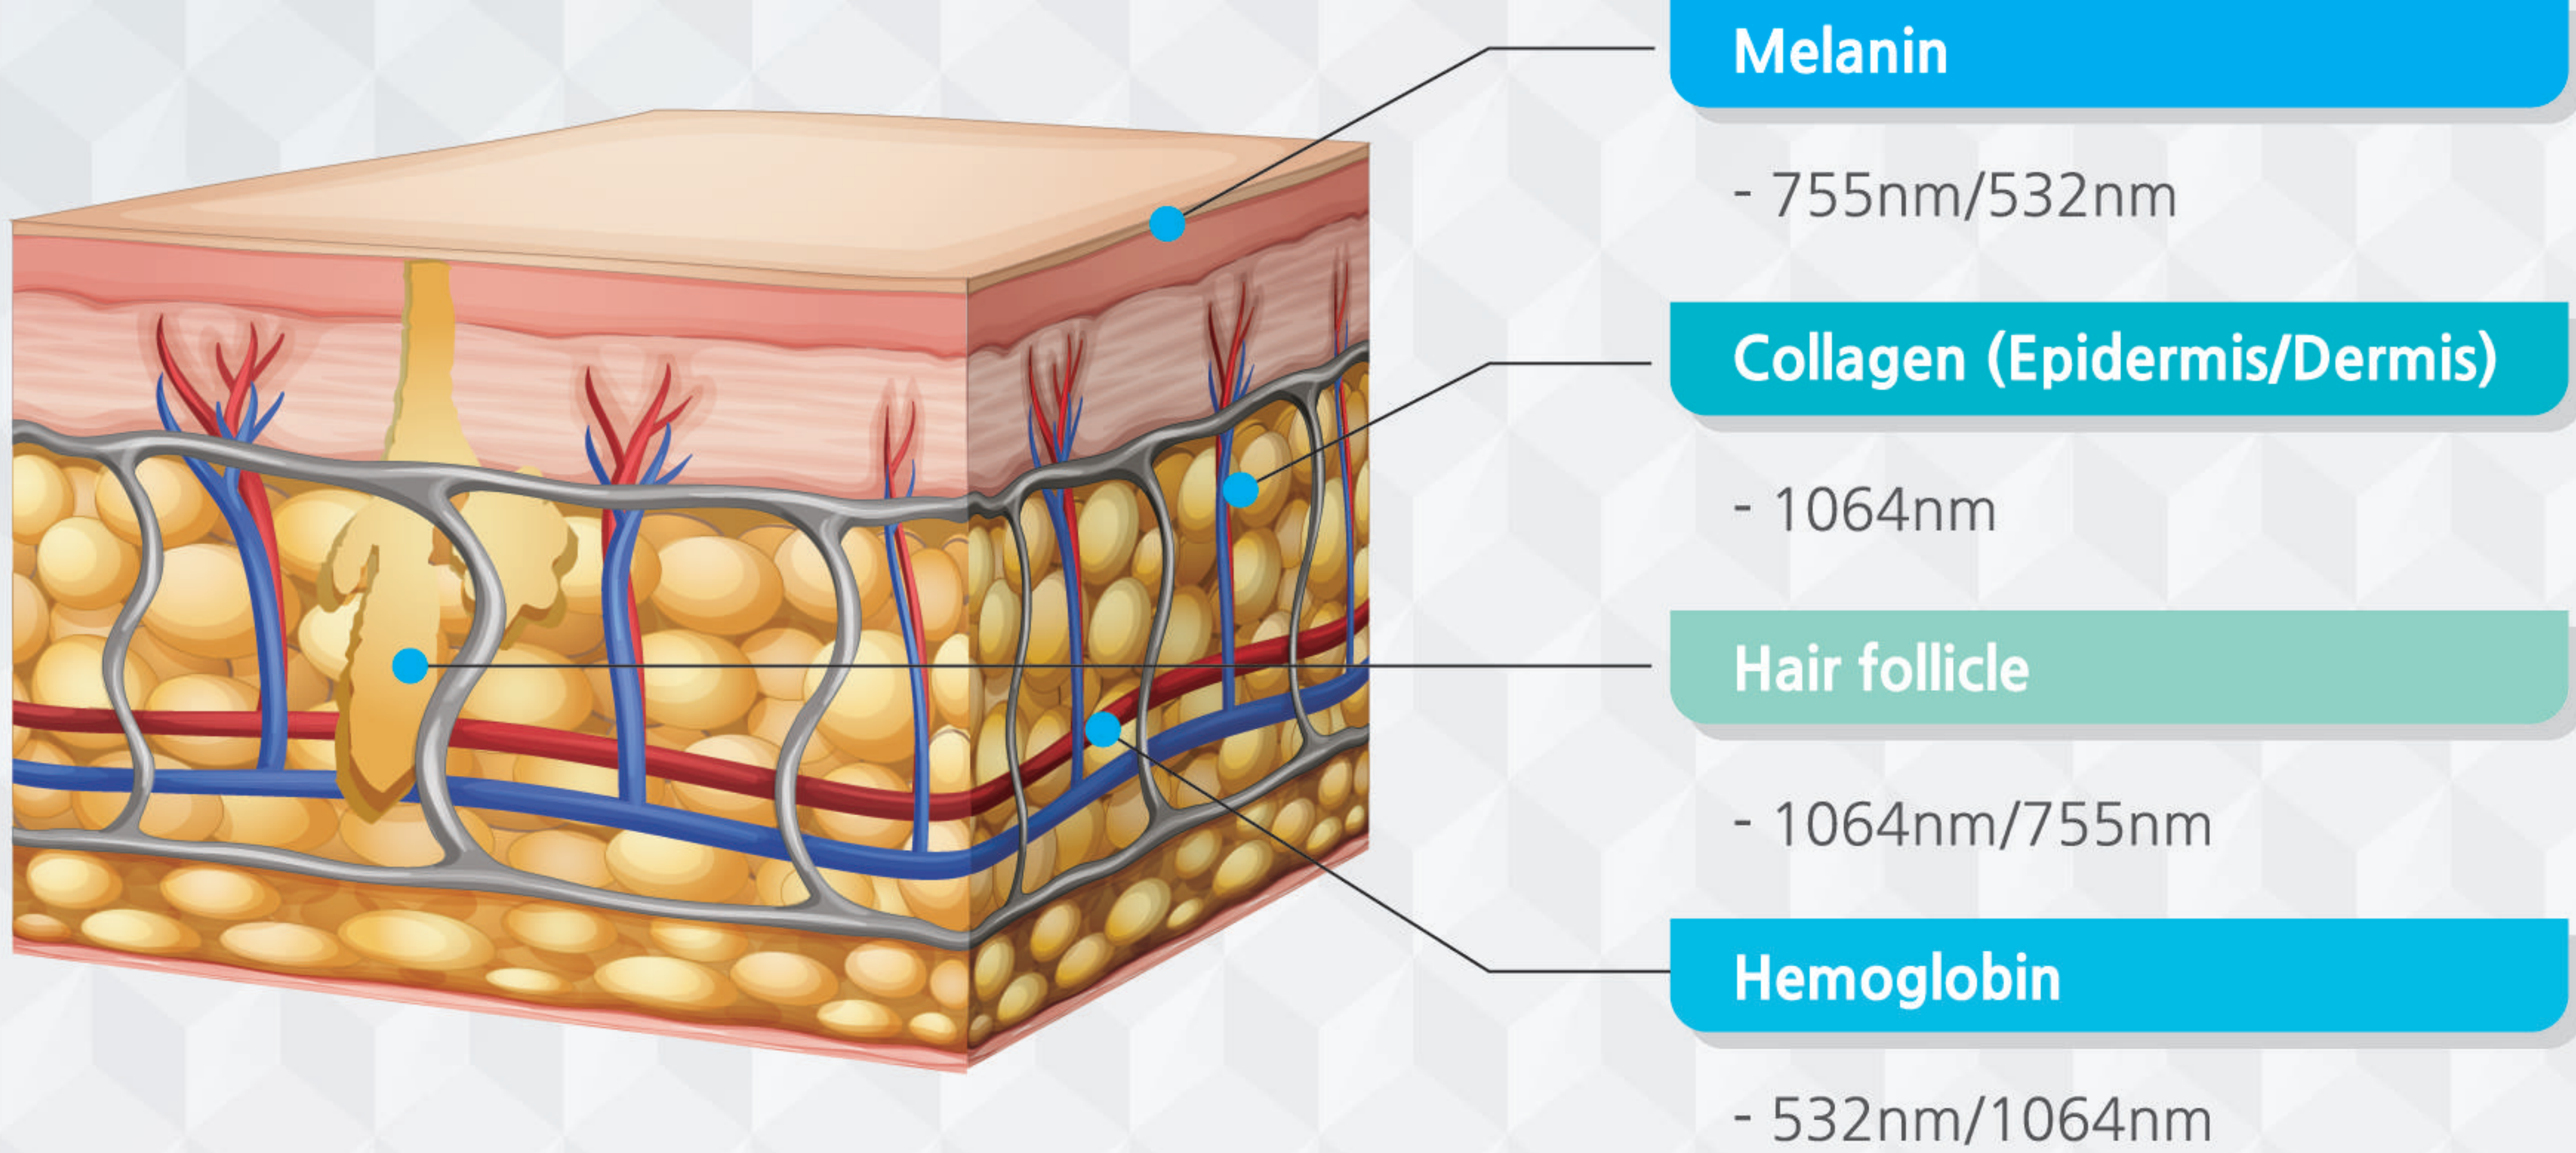

Versatile Laser system & Multiple Treatment

WAVELENGTH GRAPH

Each wavelength has its own unique absorption rate and allows various treatment depending on the wavelength.

MULTIPLE TREATMENT

Different wavelengths are readily absorbed in Hair follicle, melanin, collagen, and Hemoglobin depending on wavelength of characteristics.

"We believe quality is our most important value"

Making a Better Future

ELEMENIC researches and develops as well as manufactures products for laser business, medical and health care field. Based on innovative technology and professional workforce, We will strive to become one of the world's market leader rapidly growing.

BUSINESS AREA

Medical laser

Industrial laser

Aesthetic devices

Physical therapy

MANAGEMENT PHILOSOPHY

Creative Technology Development

Trusted by customers

Transparent business

REFINED TECHNOLOGY - ELEMENT
PREMIUM LONG PULSED LASER SYSTEM

SYSTEM SPECIFICATION

LONG PULSED LASER

Medium	Nd:YAG	Alexandrite	KTP
Wavelength	1064nm	755nm	532nm
Energy	100J	70J	10J
Pulse duration	0.1 - 300ms(multiple)		0.1 - 100ms
Pulse Rate	0.5 - 10Hz		
Spot size	2~24mm		2~10mm
Cooling system	Cryo Gas/Air cooler		
Beam Delivery	Lens-coupled optical fiber with Handpiece		
Dimensions	1000(H), 780(D), 400(W)		
Weight	130Kg
